10th grade	Demonstration School	2012-2013	8.0

Academic projects

MTECH PROJECT: Study on physical properties of Stabilized earth blocks.

With having the rich mortar of cement: lime mixture in between the stabilized blocks constructing the wallets and finding the bond strength between the rich mortar and 2 types of blocks.

ENGINEERING PROJECT: Soil strengthening of Pacchanady dumping yard using fly ash and quarry dust.

This case study is operated by using industrial waste. The CBR of soil, when the percentage of fly ash increases then strength of parameter is also increased, but after 40%, it is found to be decreased. Hence it shows that fly ash can be used for stabilizing soil of embankments, pavement sub grade and other different fields.
