I started my working life in warehousing, learning valuable skills which included teamwork with loading and unloading vehicles, also careful eye for detail whilst working on goods-in checking goods into the warehouse. Good communication was vital for keeping management updated on current situations and making sure everything runs smoothly.

I have also been a postman, which was physical work delivering on foot and bicycle, whilst also collecting in vans and careful handling of mail was required to do the job correctly.

I passed my Hgv Class 1 and have learned a new set of skills including self motivation, forward planning, positive can do attitude with patience and customer interaction
