About me

I am a hardworking individual with a positive attitude and I always strive to better myself and my skills set. I love a challenge and never give up. I have worked in various sectors. This has given me a great set of people skills. I like meeting new people. I'm very friendly , approachable and personable. I always take pride in the quality of my work and take great satisfaction knowing that I've done the best job possible. I've always wanted to drive trucks it's been a dream and I've always looked at large trucks with envy and have wanted to drive them for as long as i can remember. my great grandad was a truck driver for 30+ years and loved his job. an opportunity came up for me to do the skills bootcamp and get my class 1 hgv licence.

I have worked my hardest to pursue this dream I passed all my theory tests, cpc tests and practical tests first time and my road test with only on minor.

I've been working in grounds maintenance for the past 10 years I started as an apprentice after serving 12 month with the company I was promoted to an operative for a couple of months then quickly promoted to supervisor. I had my own round with 50+ sites to manage in the east Lancashire area. I have great knowledge of Lancashire and I'm quite well travelled and have driven most of the major motorways in the country.

I want to pursue my dream of being a class 1 hgv driver and all the challenges that this career brings.

I'm always keen and enthusiastic about learning new skills and knowledge and believe there is nothing you can't do if you put your mind to it. Outside of work I seek outdoor pursuits and I am a keen motorcyclist which is Main passion. I love the great outdoors ,walking, cycling if it's outside I love doing it.

Previously I have worked in national grid sites both on gas and electricity and have undertaken ground maintenance in substations around high voltage. I have a valid eusr card. I have worked with tree teams before on the ground using the chipper whilst working on national grid jobs around both gas and electricity.

Thank you for taking the time to read my CV and for taking me into consideration.

If I'm a suitable candidate I look forward to hearing from you soon.
