## EXPERIENCE

December 2012 - Current

**Line Operator** *MAGNA International.*, Liverpool, Merseyside

### DUTIES

performing and maintaining everyday tasks associated to a production line, such as housekeeping, quality controls, safety guidelines, repairing broken equipment, and increasing productivity.

- Monitoring all parts and devices used on each service call to maintain proper documentation and enable stock replacement.
- Utilised excellent mechanical knowledge of machines and tools to improve repair and maintenance processes.
- Consistently followed all applicable regulations, policies and procedures for health, safety and environmental compliance.
- Executed routine maintenance on equipment for monthly record targets.
- Managed quality control and maintained high customer satisfaction.
- Delegated team tasks and organised workflows to prioritise critical jobs and meet stringent deadlines.
- Trained and coached junior team members to maximise knowledge and competencies and increase performance.
- Installed parts along moving production lines, adhering to expected quantity and quality standards to meet quotas.
- Set up equipment to test and verify functionality and performance.
- Inspected equipment and systems to identify issues and report problems for repair.

January 2008 - December 2012

**FLT Driver** *Prinovis*, Liverpool, Merseyside

### DUTIES

Forklift (FLT) Operator is a professional who is responsible for moving goods around warehouses or other industrial sites, by using so a forklift to unload deliveries from trucks and stack boxes for storage purposes throughout the warehouse and other industrial property and following safety guidelines.

- Loading and unloading stock from forklifts, completing without difficulty.
- 
- Assessed loads, ensuring items were safely and securely fastened before forklift operating.
- Managed picking and packing for orders daily, checking accuracy by reviewing purchase order before placing onto forklifts.
- Conducted routine maintenance on forklifts by completing before and after checks and keeping vehicles safe and efficient.
- Stayed in line with safety regulations and safe driving practices at all times when operating forklifts.
- Used safe lifting techniques and manual handling to transport goods to designated areas when needed.

- Carried out risk assessments before operating forklifts and transporting loads, keeping in line with regulations.

May 1998 - December 2008

**Apron hand John Lennon Airport**, Liverpool, Merseyside

The aircraft is directed to a predetermined position next to or on the taxiway by apron controllers, who also regulate the order of startups and pushback. At that point, control is handed over to the ground controller. Further to add, Inbound aircrafts are transferred to the apron controller by the ground controller at another agreed position. The apron controller then routes the aircraft to it's parking stand.

- Provided guidance, training and leadership to employees to shape goals and meet targeted objectives.
- Complied with guidelines and developed policies to maintain compliance with other regulatory statutes.
