Mentored by former Head of Meryl Lynch trading desk and liability trader, Mike Morrison.

**Atmofizer Technologies**

**December 2019 – Present**

*CO- Founder*

Miami, FL

Atmofizer's Patented technology for Ultra- fine particle agglomeration provides a revolutionary method for migrating the threat of dangerous nano- scale particles, including viruses and bacteria too small to be optimally managed by traditional filters or UV lights. Atmofizer's air purification units are the first ever devices to use ultrasonic frequencies to agglomerate nanoparticles together this making viruses and bacteria larger to then pass through a UV-C light completely eradicating the Virus without the need for a filter. Atmofizer technology can destroy viruses like COVID- 19 in less than 30 mins with a 99.96 reduction rate.

- Researched and validated air purifier efficiency with industry leading virologist and physicists for MIT and Harvard.
- Raised all pre-IPO private placement funds and created Pre- IPO cap structure. Closed RTO transaction with formerly HCI Holdings Corp.
- IPO'd Atmofizer on the CSE exchange at a \$396,401,500 CAD market Cap.
- Engaged various marketing firms to manage market IR and PR
- As of December 1<sup>st</sup> Atmofizer's market cap increased to \$554,102,032 CAD from the previous listing value of \$396,401,500.
